Cognition in Parkinson's Disease

Category          Enrollment Closing Date
Parkinson's Disease          Dec 30, 2016

Description
Dr. Harrington is conducting research to find out more about brain activity related to cognitive changes in Parkinson's disease. We are looking for people who have a diagnosis of Parkinson's disease and mild to moderate symptoms (e.g., balance problems). We also are looking for adults who are in general good health. Volunteers will receive two MRI scans and neuropsychological testing.

Requirements
* Between 54 to 80 years old
* No history of stroke, head injury, epilepsy, dementia or a significant psychiatric disorder

Benefits
* Can receive $130 for completion of the MRI and neuropsychological tests
* Can receive pictures of your brain
