

Connecting Women to Care: Treatment for Military Sexual Trauma

Category

Mental Health

Enrollment Closing Date

Mar 31, 2022

Description

This study is offering treatment for women Veterans who have experienced Military Sexual Trauma (MST) and PTSD symptoms. You may be eligible to receive up to 10 sessions of therapy of one of two treatments for PTSD resulting from Military Sexual Trauma. All therapy sessions will take place in your home, delivered to you via video teleconferencing. These treatments aim to improve social functioning, PTSD symptoms, and community engagement.

Requirements

This study may be a good fit for those Veterans who: a) identify as a woman who is 18 y/o or older; b) has a history of military sexual trauma; c) is interested in home-based care; and d) have limited access to the VA and mental health care

Benefits

You may experience relief from your symptoms. Your participation may add to the knowledge about PTSD and help other Veterans with a history of military sexual trauma
