Pressure Injury Study

Category

Other

Enrollment Closing Date

Dec 31, 2025

Description

Dr. Henry York and his associates at the VA San Diego Healthcare System are looking for volunteers between the ages of 18 and 85 and being treated by your doctor for a pressure injury (wound). The purpose of this study is to compare the total number of dressing changes that happen to people whose wounds are treated with either Transforming Powder Dressing or Standard of Care. You will complete approximately 13 visits in 12 weeks.

Requirements

You may qualify if you have Stage 2, 3 or 4 pressure injury (wound), mild to moderate drainage, and no active wound infection. You will be randomized (like flipping of a coin) to either Transforming Powder Dressing or Standard of Care.

Benefits

Participating in this study may improve your wound, pain, pain medications used, rate of healing, and any complications, like infection, that may develop while your wound is healing. Participants will be compensated.
