

Chronic Pain and Depression Study

Category	Enrollment Closing Date
Other	Sep 1, 2024

Description

Researchers at the VA are combining transcranial magnetic stimulation (TMS) with an evidence-based cognitive behavioral therapy to improve the treatment of Veterans with chronic pain and depression.

Requirements

Veterans with any type of chronic pain and depression receiving services at the San Diego VA.

Benefits

Veterans may experience significant improvements in chronic pain and depression symptoms, and contribute to the understanding of how best to treat these conditions that commonly occur in Veterans.
