

Cognition and Biomarkers in Aging and Mild Cognitive Impairment

Category

Memory

Enrollment Closing Date

September 30, 2021

Description

Emily Edmonds, Ph.D. and her research associates at the VA San Diego are conducting a study to learn more about Mild Cognitive Impairment (MCI), a condition associated with risk of developing Alzheimer's disease. Participants will undergo paper-and-pencil cognitive testing, an MRI brain scan, and collection of samples (blood and cerebrospinal fluid) for analysis of proteins called "biomarkers."

Requirements

You may be eligible for the study if you are (1) a Veteran, (2) age 65 or older, and (3) have normal cognition or MCI.

Benefits

Participation in this research may improve our ability to diagnose, manage, and treat Alzheimer's disease.
