

## Post-Traumatic Peripheral Neuropathic Pain Study

**Category**

Other

**Enrollment Closing Date**

07/27/2018

**Description**

Dr. Albert Leung and associates are assessing the use of Transcutaneous Magnetic Stimulation (TMS) as a treatment option for post-traumatic chronic neuropathic pain. This is a non-invasive, non-medicated study. This study consists of 7 visits that take place over the course of two months.

**Requirements**

To be eligible, you must be a veteran or active-military 18 years or older with chronic pain on or near the surgical site or area of physical injury.

**Benefits**

TMS has been shown to alleviate symptoms associated with chronic pain. Compensation up to \$380.
